Neil Alan Rodriguez Elias

Full Stack Developer | Experienced in VB.NET, C#, Python, JS, TS | Passionate about Innovative Software Solutions

Provincia Tomás Frías, Potosí, Bolivia

Summary

I am a Full Stack developer driven by the excitement of solving complex problems and creating innovative software solutions. With a deep knowledge of diverse programming languages such as VB.NET, C#, Python, JavaScript and TypeScript, I have experience integrating diverse technologies and legacy systems to deliver scalable and efficient solutions.

My skills are not limited to the technical. I also have a passion for music, culinary arts and to a lesser extent, teaching. This combination has developed my creativity and problem solving skills, allowing me to approach challenges from different perspectives. I like to code in a clear and orderly manner, ensuring maintainability and efficiency.

Looking ahead I am interested in delving deeper into Python/ C++ because I believe these technologies are essential for AI development, video game development and cybersecurity, areas in which I would like to work.

In a team environment, I will bring my technical knowledge, creative vision and sense of organization, making me a versatile member for any team.

Experience

Jalasoft

Jalasoft Core Engineer

March 2021 - September 2023 (2 years 7 months)

Cochabamba, Bolivia

In my role at Jalasoft, I assumed the position of Full Stack Developer, contributing to a variety of internal and external projects.

Technologies Used:

I utilized a diverse range of technologies in these projects, including VB.NET, VB6, C#, React, GraphQL, TSQL, Linux, Docker, JavaScript, and TypeScript. This array of technologies enabled me to effectively contribute to complex and multifaceted projects.

Project Contributions:

Developer Interview Coding Assessment Tool:
I played a key role in contributing to the development of a web application and its services from scratch, using C#, React, Docker, and MongoDB.
Focused on containerized services as a core part of the application for server-side operations like data management, code compilation, transpilation, and execution.

Event Management Web Platform:
Contributed to the implementation of features and bug fixing in a web application for event management, using React, GraphQL, TypeScript, and MongoDB.

Business Management Software for Building Material Suppliers:
Participated in the development of desktop applications and services, utilizing VB.NET, VB6, C#, and TSQL.
Integrated these applications with SQL databases to optimize and troubleshoot various processes.
In each of these projects, my role extended beyond just developing and maintaining software; it also included innovating and streamlining processes, demonstrating my adaptability and ability to tackle diverse challenges in the tech industry.

I.G.L.A.
Supplies Manager
January 2020 - December 2020 (1 year)
Potosí, Bolivia

As the Supplies Manager at IGLA, I played a pivotal role in streamlining the company's supply management and procurement processes. My key responsibilities included:

Database Management: Efficiently managing and updating the supplies database, ensuring accuracy and easy access.

Supply Needs Planning: Developing and implementing strategies for supply requirements, enhancing the operational efficiency of the central unit.
This position allowed me to merge my development skills with organizational management, ensuring smooth and efficient handling of supplies and database upkeep.

Education

Universidad Privada Domingo Savio - UPDS

Engineering, Systems Engineer · (June 2015 - August 2021)
